To Whom It May Concern:

I am pleased to be writing this letter of endorsement for Hanover Township. Our company, CAE, is headquartered in Montreal, Canada with more than 100 sites and 7500 employees worldwide. The North East Training Center (NETC), located in Whippany, opened its doors for business in January of 2007.

Hanover Township was chosen as the site for our northeast operations for several reasons. Most important is its ideal location – close to major airports including Newark, LaGuardia and Kennedy. As a provider of training services to business aircraft pilots and technicians, this was a priority for us. In addition, many clients come to us via nearby business airports such as Morristown and Teterboro. The center is also easily accessible by many major highways, making travel extremely convenient.

Hanover Township also has a great deal to offer our clients when they are outside of the training environment. The many local restaurants and shopping centers are favorite destinations, as is downtown Morristown. New York City is also easily accessible and is a popular day trip for many of our international clients.

Finally, many major hotels are located within a five mile radius of our facility. These hotels offer the very best level of concierge service and ground transportation for our clients and visitors making it easy to do business here.

Hanover Township has proven to be a very good location for our growing business!

Sincerely,

A handwritten signature in black ink, appearing to read "Michel Azar-Hmouda", written in a cursive style.
